GLASSROCK/SUPERCAL

Safety Data Sheet Supersedes: February 15, 2019 Revised: May 25, 2021

| Section 1. Identif | ication | | |
|--|--|--|--|
| GHS product identifier | : HIGH CALCIUMLIMESTONE(SuperCal/GlassRock) | | |
| Code | : Notavailable. | | |
| Other means of identification | : Limestone, Calcium Carbonate, Calcite, Aragonite, Flux stone, Fine Ground Limestone, Rock Dust. | | |
| Product type | : Solid. | | |
| Relevant identified uses of | the substance or mixture and uses advised against | | |
| Identified uses | : Neutralization, desulphurization, flux, aggregates, mineral filler, liming, lime, feed ingredient. | | |
| Supplier/Manufacturer | : Prairie Mud Service 738 6 th Street Estevan, SK S4A 1A4 306-634-3411 | | |
| Emergency telephone number (with hours of operation) | CHEMTREC, US (800-424-9300) INTERNATIONAL: (703-527-3887) | | |
| Section 2. Hazard | Is identification | | |
| OSHA/HCS status | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). | | |
| Classification of the substance or mixture | : CARCINOGENICITY (inhalation) - Category 1A SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (respiratory tract) - Category 1 | | |
| GHS label elements | | | |
| Hazard pictograms | | | |
| Signal word | : Danger | | |
| Hazard statements | H350 - May cause cancer if inhaled. H372 - Causes damage to organs through prolonged or repeated exposure. (respiratory tract) | | |
| Precautionary statements | | | |
| Prevention | P201 - Obtain special instructions before use. P202 - Do not handle until all safety precautions have been read and understood. P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing. P260 - Do not breathe dust. P270 - Do not eat, drink or smoke when using this product. P264 - Wash hands thoroughly after handling. | | |

Section 2. Hazards identification

| Response | : P314 - Get medical attention if you feel unwell. P308 + P313 - IF exposed or concerned: Get medical attention. | |
|-------------------------------------|--|--|
| Storage | : P401 - Store to minimize dust generation. | |
| Disposal | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. | |
| Hazards not otherwise classified | : None known. | |

Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Other means of identification

- : Limestone, Calcium Carbonate, Calcite, Aragonite, Flux stone, Fine Ground Limestone, Rock Dust.

| Ingredient name | % | CAS number |
|-----------------|------------------------|-------------------------|
| | 60 - 100 0.0001 - 1 | 1317-65-3 14808-60-7 |

Crystalline silica has been found in some products at or above detection level 0.1%. Concentration is dependent upon limestone source.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

| Description of necessa | ary first aid measures |
|------------------------|---|
| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20 minutes. Get medical attention. |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Wash contaminated skin with soap and water. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 20 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Most important symptoms/effects, acute and delayed Potential acute health effects

Section 4. First aid measures

| : No known significant effects or critical hazards. | |
|---|--|
| : No known significant effects or critical hazards. | |
| : No known significant effects or critical hazards. | |
| : No known significant effects or critical hazards. | |
| <u>ptoms</u> | |
| : No known significant effects or critical hazards. | |
| : No known significant effects or critical hazards. | |
| : No known significant effects or critical hazards. | |
| : No known significant effects or critical hazards. | |
| dical attention and special treatment needed, if necessary | |
| Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. | |
| : No specific treatment. | |
| : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water | |
| | |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| | — |
|--|---|
| Extinguishing media | |
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| Specific hazards arising from the chemical | : No specific fire or explosion hazard. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon dioxide metal oxide/oxides |
| Special protective actions for fire-fighters | : No special measures are required. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency | : No action shall be taken involving any personal risk or without suitable training. | | |
|-------------------|---|--|--|
| personnel | Evacuate surrounding areas. Keep unnecessary and unprotected personnel from | | |
| | entering. Do not touch or walk through spilled material. Provide adequate ventilation. | | |
| | Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal | | |
| | protective equipment. | | |

Section 6. Accidental release measures

| For emergency re | esponders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
|-------------------|---|
| Environmental pre | ecautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways or air). |
| Methods and mate | rials for containment and cleaning up |
| Spill | : Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

Section 7. Handling and storage

| Precautions for safe handling | |
|--|--|
| Protective measures | Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures. |
| Conditions for safe storage, including any incompatibilities | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store to minimize dust generation. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

| Ingredient name | Exposure limits |
|---------------------------------------|--|
| Crystalline silica, respirable powder | OSHA PEL Z3 (United States, 6/2016). TWA: 250 mppcf 8 hours. Form: Respirable TWA: 10 mg/m ³ 8 hours. Form: Respirable TWA: 5 mg/m ³ Form: Respirable fraction TWA: 15 mg/m ³ Form: Total dust NIOSH REL (United States, 10/2013). TWA: 0.05 mg/m ³ 10 hours. Form: Respirable dust TWA: 5 mg/m ³ Form: Respirable fraction TWA: 10 mg/m ³ Form: Total dust OSHA PEL (United States, 6/2016). TWA: 50 µg/m ³ 8 hours. Form: Respirable dust ACGIH TLV (United States, 3/2017). TWA: 0.025 mg/m ³ 8 hours. Form: Respirable fraction MSHA PEL TWA 8/40 hours: 30 mg/m3/(%SiO2)+2 mg/m3 Form: Total dust |

Section 8. Exposure controls/personal protection

10 mg/m3/(%SiO2)+2 mg/m3 Form: Respirable dust

Canada

Occupational exposure limits

| Ingredient name | | Exposure limits | |
|-------------------------------------|---|---|--|
| Crystalline silica, respirable powd | er | CA British Columbia Provincial (Canada, 6/2017). TWA: 0.025 mg/m ³ 8 hours. Form: Respirable CA Quebec Provincial (Canada, 1/2014). TWAEV: 0.1 mg/m ³ 8 hours. Form: Respirable dust CA Ontario Provincial (Canada, 1/2018). TWA: 0.1 mg/m ³ 8 hours. Form: Respirable fraction CA Saskatchewan Provincial (Canada, 7/2013). TWA: 0.05 mg/m ³ 8 hours. Form: Respirable fraction CA Alberta Provincial (Canada, 4/2009). 8 hrs OEL: 0.025 mg/m ³ 8 hours. Form: Respirable particulate. | |
| Appropriate engineering controls | local exhaust ventilation or airborne contaminants belo | dust, fumes, gas, vapor or mist, use process enclosures, other engineering controls to keep worker exposure to ow any recommended or statutory limits. Engineering controls the primary or secondary risks associated with this product. | |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. | | |
| Individual protection measu | ires | | |
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. | | |
| Eye/face protection | assessment indicates this i gases or dusts. If contact is | vith an approved standard should be used when a risk s necessary to avoid exposure to liquid splashes, mists, s possible, the following protection should be worn, unless a higher degree of protection: safety glasses with side-shields. | |
| Skin protection | | | |
| Hand protection | worn at all times when han necessary. Considering the during use that the gloves noted that the time to break glove manufacturers. In the | bus gloves complying with an approved standard should be dling chemical products if a risk assessment indicates this is a parameters specified by the glove manufacturer, check are still retaining their protective properties. It should be kthrough for any glove material may be different for different accase of mixtures, consisting of several substances, the se cannot be accurately estimated. | |
| Body protection | | ent for the body should be selected based on the task being volved and should be approved by a specialist before | |
| Other skin protection | | ny additional skin protection measures should be selected rformed and the risks involved and should be approved by a his product. | |
| Respiratory protection | a risk assessment indicate known or anticipated expos | culate filter respirator complying with an approved standard if s this is necessary. Respirator selection must be based on sure levels, the hazards of the product and the safe working ator. Wear an appropriate NIOSH approved respirator if d the safe exposure limits. | |

Section 9. Physical and chemical properties

| Appearance | |
|--|--------------------------------------|
| Physical state | : Solid. [Solid or powder.] |
| Color | : White to gray. |
| Odor | : Odorless. |
| Odor threshold | : Not available. |
| рН | : 8 to 9.2 at 25°C |
| Melting point | : Not available. |
| Boiling point | : Notavailable. |
| Flash point | : Closed cup: Not applicable. |
| Evaporation rate | : Not applicable. |
| Flammability (solid, gas) | : Notavailable. |
| Lower and upper explosive (flammable) limits | : Not available. |
| Vapor pressure | : Not available. |
| Vapor density | : Not available. |
| Relative density | : 2.68 to 2.76 |
| Solubility in water | : 0.00066g/100g at20°C |
| Partition coefficient: n- octanol/water | : Not available. |
| Auto-ignition temperature | : Not applicable. |
| Decomposition temperature | : 900°C (1652°F) for 760 mmpressure. |
| Viscosity | : Not available. |
| Flow time (ISO 2431) | : Not available. |
| | |

Section 10. Stability and reactivity

| Reactivity | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|--|
| Chemical stability | : The product is stable. |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : Do not allow limestone to come into contact with incompatible materials. |
| Incompatible materials | : Reactive or incompatible with the following materials: oxidizing materials and strong acids. |
| Hazardous decomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Section 11. Toxicological information

| Information on toxicological ef | fects | | |
|---------------------------------------|-------|------|---------------------------------|
| Acute toxicity | | | |
| There is no data available. | | | |
| Irritation/Corrosion | | | |
| There is no data available. | | | |
| Sensitization | | | |
| There is no data available. | | | |
| <u>Mutagenicity</u> | | | |

Teratogenicity

There is no data available.

Specific target organ toxicity (single exposure)

There is no data available.

Specific target organ toxicity (repeated exposure)

| Name | Category | Target organs |
|---------------------------------------|------------|-------------------|
| Crystalline silica, respirable powder | Category 1 | respiratory tract |

Aspiration hazard

There is no data available.

| Information on the likely | : Dermal contact. Eye contact. Inhalation. Ingestion. |
|---------------------------|---|
| routes of exposure | |

Potential acute health effects

| Eye contact | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |

| Symptoms related to the | ph | vsical, chemical and toxicological characteristics | |
|-------------------------|----|--|--|
| | _ | | |

| Eye contact | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |

| Delayed and immediate effects and also chronic effects from short and long term exposure | | | | | |
|--|---|--|--|--|--|
| Short term exposure | Short term exposure | | | | |
| Potential immediate effects | : No known significant effects or critical hazards. | | | | |
| Potential delayed effects | : No known significant effects or critical hazards. | | | | |

Section 11. Toxicological information

| Long term exposure | |
|--------------------------------|--|
| Potential immediate effects | : No known significant effects or critical hazards. |
| Potential delayed effects | : No known significant effects or critical hazards. |
| Potential chronic health eff | <u>ects</u> |
| General | : Causes damage to organs through prolonged or repeated exposure. |
| Carcinogenicity | : May cause cancer if inhaled. Risk of cancer depends on duration and level of exposure. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Teratogenicity | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects | : No known significant effects or critical hazards. |

Numerical measures of toxicity

Acute toxicity estimates

There is no data available.

Section 12. Ecological information

Toxicity

There is no data available.

Persistence and degradability

There is no data available.

Bioaccumulative potential

There is no data available.

Mobility in soil

Soil/water partition : Not available. coefficient (K_{oc})

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of |
|------------------|--|
| | environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste |
| | disposal contractor. Waste should not be disposed of untreated to the sewer unless |
| | fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is |
| | not feasible. This material and its container must be disposed of in a safe way. Care |
| | should be taken when handling empty containers that have not been cleaned or rinsed |
| | out. Empty containers or liners may retain some product residues. Avoid dispersal of |
| | spilled material and runoff and contact with waterways, drains and sewers. |

HIGH CALCIUM LIMESTONE

Hazardous Material Information System (U.S.A.)

Health: 1 * Flammability: 0 Physical hazards: 0

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
