### Potential Health Effects

<b>Inhalation</b>	Dust may cause respiratory tract irritation. This product contains naturally occurring crystalline silica (quartz). Prolonged exposure to respirable crystalline silica has been known to cause silicosis, a lung disease, which may be disabling. Chronic inhalation exposure to crystalline silica quartz has been observed to cause lymph node effects, kidney effects and auto-immune disease. Exposure associated with most uses of this product(s) should be well below the permissible exposure limits; however, employers should perform workplace testing to determine actual exposure levels.
<b>Skin Contact</b>	May develop enough heat to cause burns if large mass is in contact with skin during hardening (hydration). Dust may cause dry skin.
<b>Eye Contact</b>	May cause mild irritation. May cause slight irritation as a "foreign object". Tearing, blinking and mild temporary pain may occur as particles are rinsed from the eye by tears.
<b>Ingestion</b>	Can irritate the mouth, throat and stomach. May cause mechanical obstruction.
<b>Carcinogenicity</b>	Probable carcinogen.
